

## Discover Europe's Hidden Stories in SOS Heritage's New Virtual Exhibition

SOS Heritage is excited to announce the launch of its latest virtual exhibition titled "A Virtual Exhibition That Brings History to Life", which will open in May 2024. This immersive online experience offers visitors the opportunity to explore Europe's rich historical legacy through rare documents, artefacts, and photographs that have been carefully preserved but largely hidden from the public eye.

The exhibition is divided into several thematic sections, each highlighting different eras and aspects of European history. Visitors will be able to explore:

- **Medieval Manuscripts:** A selection of rare manuscripts, shedding light on religious, social, and economic life in medieval Europe.
- **Revolutionary Photography:** Early photographs documenting political and social movements from the 19th and early 20th centuries, some of which are being displayed to the public for the first time.
- **Cultural Heritage Artifacts:** Unique objects from across Europe that represent the diverse cultural traditions and histories of various regions.

In addition to showcasing these historical treasures, the exhibition is designed with interactive elements, allowing visitors to explore high-resolution scans, navigate 3D-rendered artefacts, and access timelines and educational resources that provide context for each item. The virtual platform also offers personalized tours, allowing users to focus on specific periods, regions, or types of materials.

Educational institutions will also find value in the exhibition, which provides downloadable materials for schools and universities, making it a resource for teaching European history. The platform supports multiple languages, ensuring access for a global audience.

The exhibition will officially open in May 2024, and access is free through the SOS Heritage platform.
